Diego Trigo Gutierrez

AI Engineer · Full Stack Developer

Cochabamba, Bolivia (open to remote) · trigobol23@gmail.com · +591 79328447 · LinkedIn · Portfolio

Professional Summary

Full Stack AI Engineer at zékiri, where I design and build end-to-end AI products: LLM pipelines, automations and web interfaces for SaaS. I write and review code in TypeScript, Python, Solidity, Kotlin and C#, with a focus on prompt engineering, evaluating model outputs and code quality. Final-year Systems Engineering student (UCB) and technical communicator, formerly University Ambassador for Ethereum Bolivia.

Experience

Full Stack AI Engineer — zékiri · Remote · Jun 2026 – Present

- Design and build end-to-end AI products, from LLM pipelines to user interfaces.
- Develop full-stack solutions for scalable SaaS products.
- Automate business processes with workflow orchestration tools (n8n) and API integrations.
- Translate business requirements into scalable, high-performance technical systems.
- Apply prompt engineering and technical research to select and tune models and tools.

Automation Developer — zékiri · Remote · Feb 2026 – May 2026

- Designed and built automation workflows with n8n.
- Evaluated and integrated new tools and APIs to extend system capabilities.
- Analyzed market trends and user behavior to improve product usability.

University Ambassador — Ethereum Bolivia · 2025 – Jun 2026

- Connected the Ethereum community with Bolivian universities.
- Organized and delivered talks on Web3 and decentralized development for technical and general audiences.

Featured Projects

Multi-tenant SaaS platform for businesses — zékiri

- Multi-tenant web platform with 15+ modules: point of sale, orders, subscriptions, gift cards, CRM, per-branch catalog and stock, deliveries with routing, finance, team and content.
- Built the AI content module from scratch: it generates LinkedIn posts from each business's context, ICP and platform rules, plus AI-generated carousels and images, produced one by one or in scheduled batches.
- Monorepo with three Next.js apps (business dashboard, super admin and public site) and shared packages for permissions, plans, deliveries, branding and UI.

- Each business's data isolated in a single Postgres database with row-level security (RLS), roles and per-business plan entitlements.
- Stack: strict TypeScript, Next.js 16 (App Router, server actions), React 19, Supabase, Drizzle ORM, Turborepo, Tailwind CSS v4, shadcn/ui, Zod.

HireTree — 1st place, AI & Web3 track, ETH Bolivia Buildathon 2025

- Platform that assesses soft skills with LLMs and issues verifiable on-chain credentials (CV-NFT); deployed on Arbitrum and Avalanche.
- Built in 72 hours by a team of three; winner certificate issued on-chain by Ethereum Bolivia and Unlock Protocol DAO.
- Stack: Next.js, TypeScript, LLMs, Solidity, smart contracts.

Technical Skills

- **AI & automation:** LLMs, prompt engineering, model output evaluation, AI agents, n8n, API integration.
- **Languages:** TypeScript, JavaScript, Python, Solidity, Kotlin, C#, Java, C++.
- **Frontend:** React, Next.js (App Router), Tailwind CSS, shadcn/ui, HTML5.
- **Backend:** Node.js, NestJS, Supabase, Drizzle ORM, microservices, WebSockets, ASP.NET (Razor Pages, ADO.NET).
- **Web3:** smart contracts, Ethers.js, Web3.js, Arbitrum, Avalanche.
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase.
- **Tools & methods:** Git, Turborepo, pnpm, Figma (UI/UX), Scrum, Jira, Linear, Notion, Trello.

Education

B.S. Systems Engineering — Universidad Católica Boliviana "San Pablo", Cochabamba · Feb 2022 – Dec 2026 (expected)

Certifications & Awards

- AI & Web3 Track Winner — ETH Bolivia Buildathon 2025 (NFT certificate, Ethereum Bolivia and Unlock Protocol DAO).
- n8n Course: No Code AI Agent Builder — Simplilearn SkillUp, February 2026 (code 9811649).

Languages

- Spanish: native.
- English: upper-intermediate (daily technical reading and writing).
